

Rear Axle Limited Slip Differential Cutaway Model 126

The Rear Axle Limited Slip Differential is a cutaway trainer intended for use in demonstrating the operation, installation and setup of solid axle components. In addition to the basics of setting pinion depth and side clearance, this unit allows the student to identify all components, check/adjust tooth meshing, set backlash, remove/install axles and remove/install the carrier. It also permits students to learn the operation of the Eaton limited-slip locker system.

Features:

- General Motors Complete 8.5" Differential/Axle.
- Eaton Limited-Slip Traction Control System.
- Carrier and Pinion Areas Cut-Away for Easier Viewing/Instruction.
- All surfaces Power-Coated for Durability and easy Identification.
- Includes Casters to Simplify Movement.
