

# Electronic Ignition (EI) System Model 1772

The ATech Electronic Ignition (EI) System (model 1772) is designed to teach computer and network-controlled automotive electronic ignition system operation. This trainer allows for instructor demonstration, student hands-on reinforcement and troubleshooting practice. Powered with an internal power supply. Includes courseware.

## Features:

- Actual new vehicle components.
- Operated as a stand-alone trainer, or connected to the GM J1850 OBD II (model 2652) via the Interconnect Cable (model 2657) to teach and demonstrate electronic ignition.
- Intermittent and hard fault codes can be inserted using the built-in keypad, a single computer or the ATech Network System (ANS).
- Circuit identification with probe points.
- Compatible with ATech's Instructor Management Program (IMP).
- Network and interconnect circuits are protected against over-current and polarity reversal.
- Courseware Includes: Instructor Guide, Student Manual and Service Manual Information.
