

Computer Based Instruction

ATech's Electricity and Electronic Programs are Computer Based Instruction, available for personal computers.

Computer Based Programs

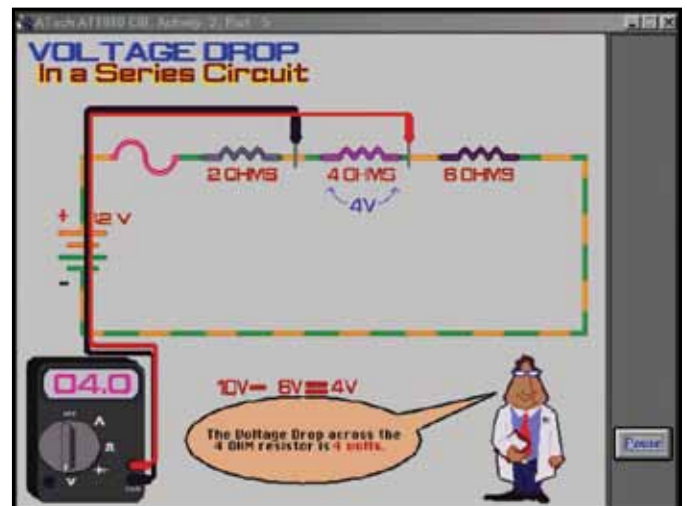

The #1 provider of Engine Performance Trainers continues to develop innovative computer based simulation programs...

ATech's automotive fundamentals programs have harnessed the power of computers to enhance the learning experiences with animations of important concepts.

Hands-on activities provide "need-to-know" reinforcement, while computer controlled diagnosis provides troubleshooting practice and competency testing.

Invites student interest and participation.

- Automotive Electricity Computer Based Instruction (CBI) Software (Model 1810W)
- Automotive Electronics Computer Based Instruction (CBI) Software (Model 1820W)
- Hands-on and Computer Animation Hold Student Interest

- Provides Troubleshooting Practice and Competency Testing
- Classroom Management with Remote Fault Insertion Capability
- Student Record Keeping with Print-Outs
