

# Computer Based Instruction

## Computer Based Programs

The #1 provider of Engine Performance Trainers offers computer based simulation. ATech's automotive fundamental programs harness the power of computers to enhance the learning experience with animations of important concepts. "Hands-on" activities provide "need-to-know" reinforcement, while computer controlled diagnosis provides troubleshooting practice and competency testing. Keeps students highly motivated.

## Engine Performance Troubleshooting Trainer Model 3601

The ATech Engine Control Fundamentals Program includes the Model 3601 Engine Performance Troubleshooting Trainer. This platform will support 3610, 3620 and 3630 computer based courses and provides students with "hands-on" reinforcement.
