- Trade Updates
- OEM Training

“I’d like to express my gratitude for all the assistance that your organization has provided. We have successfully installed the GM Virtual Trainers in our Automotive Computer Lab. This, of course, could not have been possible without the assistance of your staff. Our instructors love the product and have begun developing lesson plans to utilize the software this semester. We have seen a dramatic increase in the knowledge retention of our auto students since implementing a computer lab with automotive based software, and we look forward to enhancing their learning process with your products. Again, thank you for all your assistance through this matter”

Trident Technical College

“ATech’s support and assistance for our training center personnel have been superb. Instructors have commented as to the fast and on-target response of the ATech support staff. One other item must be mentioned- no other company has ever given Ford 10 years of warranty service on any product quality and their dedication to superior product support.”

Ford Motor Company Training Director
