

Charging System - Model 812 FJ

This trainer is part of an electrical systems program which presents live operation and study of Charging Systems, and provides courseware for use by students and instructors. Detailed below are a few of the features of the trainer:

- Actual Charging System operation.
- Capable of connecting to and charging a 12VDC automotive battery.
- Ability to perform actual service manual test procedures.
- Faults can be inserted via keypad, local computer or ATech Network System (ANS).
- Software interface allows hard and intermittent faults to be entered and specified by the instructor.
- Provides an advanced level of instruction by duplicating actual on-vehicle troubleshooting procedures.
- Includes a courseware package that contains units based on NATEF tasks requirements.
